

Educational Opportunities for Design Professional

Building Information Modeling: Claims Concerns and Practice Considerations

A Beazley Risk Management Webinar – for Beazley insureds only.

Thursday, December 8, 2011 12:30PM to 2:00PM (EST)

Presented by:

Michael B. Murphy, Esq. of Severson & Werson, a Professional Corporation

Dwayne G. Miller, PE, RCDD of JBA Consulting Engineers

Colleen M. Palmer, Esq. of Beazley Group

In this webinar, we shall review basic Building Information Modeling (“BIM”) concepts and objectives in utilizing BIM. We will then examine a lawsuit related to the use of BIM by an architect and the lessons learned from the claim. We will also discuss the challenges and advantages of BIM and talk about the technical considerations of implementing BIM from the design professional’s standpoint.

Please gather all of your professional staff and join us for this valuable 90-minute seminar where you and your staff will have an opportunity to:

- Review BIM basics, including the definition of BIM and objectives in utilizing BIM;
- Learn about a BIM lawsuit and discuss the lessons learned from the litigation;
- Explore the pros and cons of BIM and technical considerations of utilizing BIM from a design professional’s standpoint;
- Ask questions to the presenters; and
- Qualify for premium and continuing education (C.E.) credits (as applicable)
